PROFESSIONAL SUMMARY

Frontend Software Engineer with 3.5+ years of experience designing and building scalable web and mobile applications using React, Angular, React Native, Next.js, and TypeScript. Skilled in frontend architecture, performance optimization, reusable component design, and test automation, with a proven track record of delivering enterprise solutions across banking, hospitality, insurance, and e-commerce domains for global clients including Marriott, Citi Bank, and Colina Insurance.

TECHNICAL SKILLS

Frontend & Mobile: React.js (React 18+), Next.js (SSR/SSG/ISR), Angular, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Xcode, Android Studio

Frontend Architecture & State Management: Redux Toolkit, Context API, TanStack Query (React Query), Reusable Component Libraries, Component-Driven Architecture, Component Composition, Clean Architecture, Micro-Frontends

Performance, Testing & Quality: Webpack, Core Web Vitals (LCP, CLS), Lazy Loading, Code Splitting, Bundle Optimization, Responsive Design, Accessibility (WCAG 2.1 AA), Storybook, Lighthouse, Jest, React Testing Library (RTL), Cypress, Jasmine, Karma, BDD (Gherkin), SonarQube

Backend, Cloud & DevOps: Java, Spring Boot, REST APIs, MongoDB, PostgreSQL, Redis, Firebase, AWS (EC2, S3, ECS, Lambda, CloudWatch), Git, Bitbucket, Jenkins, Harness, CI/CD, Docker, Kubernetes, OpenShift, Helm, Splunk (Monitoring & Observability)

AI-Assisted Engineering: GitHub Copilot, Cursor, Claude Code, ChatGPT, Prompt Engineering, Agentic AI

PROFESSIONAL EXPERIENCE

Software Engineer I | *HashedIn by Deloitte* **Jul 2024 – Present**

- **Frontend Architecture:** Architected scalable, pixel-perfect enterprise web applications using **React.js** and **Angular**, implementing reusable component libraries, enterprise design system principles, and component-driven architecture using Atomic Design and responsive layouts (CSS Grid/Flexbox).
- **Testing & Quality:** Elevated unit and E2E test coverage to **90%+** using **React Testing Library, Jest, and Cypress**, ensuring WCAG accessibility compliance, improving code quality, and significantly reducing production defect rates.
- **Performance Optimization:** Spearheaded frontend performance optimization through Core Web Vitals improvements (code splitting, lazy loading, bundle optimization, and caching), improving Largest Contentful Paint (LCP) by **35%**, reducing bundle size by **28%**, and decreasing average page load time from **4.1s to 2.6s**.
- **Leadership & Collaboration:** Mentored **150+ interns** in modern frontend engineering practices (React/Angular), conducted code reviews, and collaborated with product managers, QA engineers, and cross-functional teams in Agile environments to accelerate feature delivery by **20%**.

Software Engineer Trainee | *Damco Solutions* **Jan 2023 – Feb 2024**

- **Mobile & Component Design:** Engineered a reusable **React Native UI component library** using Clean Architecture and Component Composition, establishing a scalable cross-platform foundation for consistent, maintainable mobile applications.
- **Production Delivery:** Architected and delivered **3 production-grade React Native applications**, integrating Firebase Firestore, Realm, Redux Saga, REST APIs, OAuth/JWT authentication, and reusable UI components built with React Native Paper, while successfully deploying releases to the Apple App Store and Google Play.
- **API Integration:** Developed complex offline-first data synchronization logic and integrated RESTful backend APIs to support critical business workflows while ensuring reliable data synchronization across mobile platforms.
- **Debugging & Stability:** Performed root cause analysis and resolved **187+ critical UI and API defects**, improving application stability, performance, and successful UAT readiness within a single sprint cycle.

KEY PROJECTS

Marriott – mTrust Incident Management

Mar 2026 – Present

Tech Stack: *React.js, Context API, TanStack Query (React Query), ServiceNow, Agentic AI, Claude* [Live Link](#)

- Single-handedly architected and developed the entire **Coordinator** persona UI, delivering a feature-rich **React** application that completely eliminated the need for direct ServiceNow interaction.
- Engineered comprehensive incident management workflows, enabling users to apply advanced filters, monitor breached SERs, reopen/close incidents, trigger automated email notifications, and improve operational efficiency.
- Integrated dynamic **Agentic AI** conversational interfaces and utilized the **TanStack** ecosystem (Query, Table) for advanced data fetching, state management, and robust UI performance optimization.

Citi Bank Financial Applications

Jan 2025 – Feb 2026

Tech Stack: *Angular, Java, Spring Boot, Kafka, Jenkins, Harness, Lightspeed, Helm, Kubernetes, Gherkin*

- Engineered a high-performance **Angular** UI for trade settlements handling massive datasets via advanced tabular rendering and Excel upload/export, while optimizing load times, resolving code smells, and boosting **Jasmine** test coverage beyond **90%**.
- Engineered a new settlement trade processing flow using **Spring Boot, Kafka**, and REST APIs by designing Kafka topics, implementing trade-routing logic based on trade types, authoring BDD test cases, documenting end-to-end workflows on Confluence, and enabling seamless team adoption through structured KT sessions.
- Authored **BDD automation suites** (Component, Template, Integration) using **Gherkin** and Java glue code to validate asynchronous **Kafka** flows, executing via **Harness** post-deployment hooks for 15+ services.
- Managed end-to-end production releases for **2 enterprise services** using **Lightspeed**, from creating change requests and configuring environment-specific deployments to validating production deployment logs. Authored comprehensive step-by-step deployment documentation and conducted knowledge transfer (KT) sessions to enable seamless adoption across the team.
- Owned a full-stack **Java** and **Angular** contract-testing visualization utility to automate inbound/outbound flow and mapping version comparisons, eliminating manual Kafka/database queries for the QA team.

Colina Insurance Mobile App

Jul 2023 – Feb 2024

Tech Stack: *React Native, TypeScript, Redux Toolkit, Firebase, Realm* [iOS App Store](#) | [Google Play Store](#)

- Architected and launched a cross-platform **React Native** insurance application integrating Firebase, Realm, offline-first synchronization, and REST APIs to deliver a reliable mobile experience across Android and iOS.
- Built responsive, reusable UI components and optimized application performance to deliver smooth user experiences across multiple screen sizes and devices.

AWARDS & RECOGNITION

- **Excellence Award (Jun 2026):** Commended by stakeholders for end-to-end ownership and flawless delivery of high-priority production features, driving technical design discussions and authoring Architecture Decision Records (ADRs).
- **Excellence Award (Jan 2026):** Recognized for effectively mentoring 150+ engineers, executing fair evaluations, and fostering career growth without impacting parallel project deliverables.
- **Rising Star Award (May 2025):** Awarded for proactively resolving QA bottlenecks by developing a robust Java/React utility to automate data flow and version comparisons at Citi Bank.

EDUCATION & CERTIFICATIONS

Claude Certified Architect – Foundations | Anthropic

Jun 2026

AWS Certified Developer Associate | Amazon Web Services

Apr 2026

AWS Certified Cloud Practitioner | Amazon Web Services

May 2025

JavaScript Security Specialization | Infosec

Mar 2025

B.Tech in Computer Science (CGPA: 7.61) | Lovely Professional University

May 2023
