PROFESSIONAL SUMMARY

Frontend Engineer with 3.5+ years of experience taking end-to-end ownership of scalable web and mobile applications using React, Angular, React Native, and TypeScript. Combines a precision-driven approach to Core Web Vitals and UI architecture with cross-functional depth across CI/CD automation, cloud infrastructure, and tool migrations. Known for active continuous learning, mentoring junior engineers, and driving both rapid feature velocity and long-term product stability.

TECHNICAL SKILLS

Frontend & Mobile: React.js, Next.js, Angular, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Micro-frontends, Debugging

State & Data Layer: Redux Toolkit, Context API, TanStack Query (React Query), RESTful APIs, Kafka

Testing & Quality: Jest, Jasmine, Karma, SonarQube, WCAG 2.1 (a11y), Gherkin/BDD

Build Tools & Architecture: Webpack, Vite, Gradle, Maven, Git, Web Vitals, Performance Optimization

Cloud, DevOps & Databases: AWS (EC2, S3, Lambda), Docker, Kubernetes, OpenShift, Helm, Jenkins, Harness, Firebase, MongoDB, PostgreSQL, Redis, Realm, CI/CD

PROFESSIONAL EXPERIENCE

Software Engineer I – HashedIn by Deloitte

Jul 2024 – Present

- Developed enterprise web application features using React.js and Angular, creating reusable component libraries to enforce design system standards across teams.
- Increased unit and integration test coverage to 90%+ using Jasmine and Jest, reducing production bugs and ensuring WCAG accessibility compliance.
- Optimized frontend web performance, reducing average page load time from 4.1 seconds to 2.6 seconds by implementing code splitting, lazy loading, and Core Web Vitals fixes.
- Mentored 50+ software engineering interns on React and Angular core principles, conducted regular code reviews, and led on-boarding sessions.

Software Engineer Trainee – Damco Solutions

Jan 2023 – Feb 2024

- Deployed 2 production React Native applications to the iOS App Store and Google Play Store, integrating Firebase, Realm DB, Redux, and JWT authentication.
- Resolved 180+ critical UI and API integration defects during development cycles, achieving stable user acceptance testing (UAT) releases.

KEY PROJECTS

Marriott – mTrust Incident Management

Mar 2026 – Present

Tech Stack: React.js, TanStack Query, Context API, Webpack, ServiceNow REST APIs

- Owned the complete front-end lifecycle for the Coordinator workspace in React.js, translating product requirements into UI features, unblocking cross-functional dependencies, and guiding backend engineers to enable seamless incident processing without ServiceNow dependencies.
- Implemented custom ticket filtering, automated email triggers, and high-performance tabular rendering using TanStack Table and TanStack Query.
- Resolved application build configurations, reduced bundle size using route-based code splitting, dynamic imports and asset optimization, while closing critical UAT defects for a smooth production launch.

Citi Bank Financial Applications

Jan 2025 – Feb 2026

Tech Stack: Angular, Spring Boot, Helm, Kafka, Gradle, Jenkins, Harness, OpenShift, Gherkin

- Engineered high-throughput Angular interfaces for trade settlement visualization, supporting multi-row grid management and bulk Excel data processing.

- Modernized project infrastructure by upgrading core build configurations and streaming frameworks, including Gradle build updates and Apache Flink version migrations across multiple services.
- Diagnosed and resolved critical security vulnerability and access compliance defects across services, fixing key CheckmarkX static analysis findings and CAMP authorization issues.
- Modernized CI/CD for 3 enterprise applications by migrating deployment workflows from GitHub, Jenkins, and TeamCity to Harness, uDeploy, and Lightspeed.
- Designed Gherkin-based BDD test suites at component, integration, and template levels for 15+ services, validating consumed Kafka messages against expected outputs via Harness post-install hooks.
- Created an internal visualization application using Java and Angular to compare contract data mappings, automating manual QA database checks.

Colina Insurance Mobile Application

Jul 2023 – Feb 2024

Tech Stack: React Native, TypeScript, Redux Toolkit, Firebase, Realm

- Developed a cross-platform mobile insurance application supporting offline sync with Realm DB and cloud authentication via Firebase.
- Optimized mobile layout structures to ensure uniform rendering across wide range of iOS and Android device screen sizes.

CERTIFICATIONS

Claude Certified Developer (CCDV-F) – Anthropic	Sep 2026
Claude Certified Architect (CCA-F) – Anthropic	Jun 2026
AWS Certified Developer Associate – Amazon Web Services	Apr 2026
JavaScript Security Specialization – Coursera (Infosec)	Mar 2025
AWS Certified Cloud Practitioner – Amazon Web Services	May 2025

AWARDS

- **Excellence Award (Deloitte, Jun 2026):** Awarded for technical leadership on high-impact production releases and writing Architecture Decision Records (ADRs).
- **Excellence Award (Deloitte, Jan 2026):** Recognized for managing client deliverables on the Citi project while leading a 1-week Angular training track for 50+ interns, including curriculum design, assessments, and grade normalization.
- **Rising Star Award (HashedIn By Deloitte, May 2025):** Granted for building an automated testing utility that resolved critical release bottlenecks.

EDUCATION

Bachelor of Technology in Computer Science (CGPA: 7.61) Lovely Professional University	2019 – 2023
